Drawings

1. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to because as indicated for Fig. 7, numeral “703” labeling the thin film of silver chloride should be labeled as numeral -- 702 --. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested: -- A MAGNETIC TRANSDUCER HAVING ELECTRODES WITH METAL AND A LAYER OF A SALT OF THAT METAL --.

Claim Rejections - 35 USC § 112

4. Claims 1-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, the term, “an electrode” at line 2 is unclear as to what electrode is the applicant referring to, since at line 1, it refers to electrodes. Is the applicant referring to a statement for an electrode or is it a characteristic of a general electrode? At line 4, it refers to a phrase, “such that it is interposed between”, it is unclear as to what element is interposed between.

Claim 8, it is unclear as to what is meant by the phrase, “partially reduced back to”.

Claim 9, at line 1, it refers to a pair of electrodes, it is unclear as to whether they are the same electrodes or different as claim 1 does not refer to a pair.

Claim 10, it seems that after “claim 1” some terms are missing.

Examiner has addressed only the first set of claims regarding the issues. Applicant is advised to check the similar issues in the rest of the sets of the claims.

Allowable Subject Matter

5. Claims 1-48 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2855

6. The following is a statement of reasons for the indication of allowable subject matter:

The prior arts made available do not teach or fairly suggest, alone or in combination, a magnetic transducer for flow measuring having electrodes and an alternating magnetic field, wherein the electrode has lower noise energy at frequencies below 5Hz or 1Hz than an electrode comprising carbon or corrosion-resistant metal alloy, and comprising a metal and a layer of a salt of that metal arranged such that the salt of that metal is interposed between the metal and the fluid.
